

Upstream (EXPLORATION & PRODUCTION)

- Regional Geology and Tectonic Evolution
- Basin Analysis and Petroleum Systems Modeling
- Unconventional Hydrocarbon Plays
- Sedimentology, Stratigraphy and Reservoir Characteristics
- Potential Fields (gravity & magnetic)
- Seismic Acquisition, Processing, Imaging and Interpretation
- Geochemical Analysis and Techniques
- Reservoir Engineering
- Petrophysics & Rock Analysis
- Reservoir Characterization
- Reservoir Management & Uncertainty
- Drilling & Completion Technologies
- Production Optimization
- New development in enhanced oil recovery (EOR)
